

DATACARD® LOCAL GOVERNMENT ID SYSTEMS

Entrust Datacard delivers proven ID card solutions to local and city governments and agencies based on many years of experience working with organizations like yours.

Protect your staff, assets and budget with the best in photo ID systems

Local governments are made up of trusted faces and places. Photo ID cards empower you to quickly and easily identify these faces and protect these places, adding a critical layer of security that seamlessly integrates with access control systems. Datacard® ID systems deliver affordable value to match tight budgets, making it easier to justify the cost of implementing photo IDs for all employees in a variety of roles. Across the country, local governments turn to Datacard ID systems for their wide-ranging benefits:

Enhanced security. Instantly identify staff and visitors and know at a glance who is authorized to be onsite.

Flexible applications. In addition to visual identification, your Datacard® ID cards can control access to buildings, connected devices and networks. One single ID card can manage all access privileges for an employee.

Simplified operations. Both Datacard® identification software and our ID card printers offer user-friendly operation to maximize productivity. Staff can begin issuing ID cards after just a few simple minutes of training.

A sense of community. Create ID cards that showcase the visual brand identity of your local government and reinforce a sense of community. You can even create different ID badges for different departments, as well as visitors.

A dependable investment. Every day, local governments are faced with budget challenges. Datacard® ID systems provide a cost-effective security and access-control solution, backed by more than 45 years of industry-leading experience that protects your investment.

Datacard®

Get everything you need from Entrust Datacard

Security, facilities, activities, budget — a lot of factors influence your ID system. An authorized Datacard® provider can help you evaluate all of them. Our providers are experts at working within your security, technical and budget requirements. They'll design the right ID system for your local government, using industry-leading system components from Entrust Datacard.

Datacard® ID card printers deliver best-in-class performance and reliability.

- Easy to learn and operate with intuitive, soft-touch LCD control panels.
- Advanced TruPick™ card handling minimizes jams while driving full-color print speeds up to 200 cards per hour.
- Cards and ribbons load in seconds to keep long print jobs moving.
- Can be field-upgraded for functions such as magnetic stripe, proximity and smart card encoding.

Datacard® identification software makes producing ID cards easy.

- Design cards to show photos, text and bar codes, as well as visual branding.
- Exchange cardholder information with databases and enrollment systems.
- Expand with modules for proximity and smart cards, and visitor management.
- Choose the edition that fits current needs; then upgrade to add more capabilities.

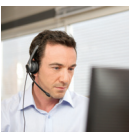

Datacard® Certified Supplies support more reliable card printing.

- Full-color printer ribbons produce clear, vibrant image quality.
- Engineered and tested for total compatibility with Datacard® printers.
- Intelligent Supplies Technology™ reduces ribbon waste, prevents errors and automatically adjusts printer settings for optimum output.

Responsive, local support helps you get the most from your Datacard system.

- Authorized Datacard® providers offer expert advice on system planning, buying and upgrades.
- Experienced technicians perform installations, upgrades and maintenance.
- Firsthand knowledge of local government; regulations and funding.

Innovation Focused On You

We are committed to delivering card issuance breakthroughs that matter to you.
